

Oulan Li

Creative Technologist | HCI & Interactive Systems

Pittsburgh, PA | oulanl@andrew.cmu.edu

EDUCATION

Carnegie Mellon University | Pittsburgh, PA

Master of Entertainment Technology (MET) | 2025-2027, expected

University of Pennsylvania | Part-time

Master of Computer and Information Technology (MCIT) | 2025-2027, expected

University of California San Diego

B.S. in Cognitive Science, Specialization in Design and Interaction

Minor in Design | 2021-2025

TECHNICAL SKILLS

Programming & Machine Learning: Python, Java; Weka

Real-Time & 3D Tools: Unity animation and shader workflows; Autodesk Maya modeling, texturing, animation

Interactive Systems: AR/VR interaction design, gesture-based interaction exploration, multi-user displays

Interface Design: Figma; interface adaptation across hardware platforms

Production: Milestone planning, task allocation, schedule tracking

PROJECT EXPERIENCE

Cylindrical Display Interaction Research | 360 Studio

Producer & UI/UX Designer | August 2026-Present

- Investigate a cylindrical display's hardware capabilities and interaction constraints for shared, multi-user experiences.
- Design exploratory adaptations of 2D and 3D games to examine how interfaces and interactions translate to a cylindrical display.
- Lead team coordination, track progress, and prioritize concepts for exploration and development.

Educational AR Interaction Exploration | Tilt Five & Alice 3

3D Artist & UX Designer | January-May 2026

- Explored Tilt Five's AR capabilities and top-down viewing constraints through an educational experience using Alice 3.
- Applied programming knowledge to the design of 3D AR interactions that introduce computing concepts to K-12 learners.
- Created 3D models, textures, and animations tailored to the platform's viewing perspective and younger users.

Gesture-Based VR Interaction Exploration | Meta Quest 3

Project Manager & 3D Artist | September-December 2025

- Explored Meta Quest 3's gesture-based interaction capabilities through the collaborative development of an experimental VR experience.
- Created 3D models, textures, and animations for the VR environment, using narrative context to make gesture-based interactions meaningful.
- Managed project progress and coordinated team tasks throughout development.

1v3 Multiplayer Game | Maniac Studio

Producer & Experience Designer | December 2025-Present

- Lead production for a 1v3 multiplayer game targeting a December 2026 Steam release.
- Coordinate milestones, task allocation, and schedules across design, art, and programming.
- Design player flows, interface layouts, and gameplay feedback to communicate roles, objectives, and available actions.
